CAREER OBJECTIVE

Highly motivated Computer Science student seeking an entry-level Software Development role. Strong in problem-solving and core programming, with an interest in AI and web development. Eager to build scalable applications, contribute to impactful solutions, and grow as a reliable software professional.

EDUCATION

Keshav Memorial Engineering College <i>B.E in Computer Science</i>	2023 – 2027 CGPA: 7.88
Alphores Junior College <i>Higher Secondary Education</i>	2020 – 2022 Percentage: 86%
Narayana High School <i>Secondary School Education</i>	2019 – 2020 CGPA: 10.0

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript
Frontend: HTML, CSS, React.js
Frameworks: Spring Boot, FastAPI, Flask
Databases: MYSQL, MongoDB, Firebase
Machine Learning: TensorFlow, CNN, Transformers, Computer Vision, MediaPipe, OpenCV, Pandas, NumPy, Matplotlib
Core Concepts: Operating Systems, Computer Networks, OOP, DBMS, Data Structures & Algorithms
Tools: Git, GitHub, Kubernetes, VS Code

PROJECTS

- FIZI – AI-Powered Fitness Application** | *React Native, Expo, TypeScript, Firebase, Flask, MediaPipe* Sep 2025 – Present
- Built a cross-platform fitness app with AI-driven workout form analysis using MediaPipe and personalized nutrition recommendations powered by a Flask backend.
 - Published on Google Play Store; reached 100+ downloads within the first month of release.
 - Delivered features including adaptive workout programs, performance analytics, and smart dietary suggestions.
- Collaborative AI – Multi-Model LLM Deliberation System** | *Python, FastAPI, React* Dec 2025 – Mar 2026
- Built a 3-stage LLM pipeline that routes queries in parallel to 11+ models via OpenRouter, with graceful fallback on individual model failures.
 - Designed an anonymized peer-review stage where models rank each other’s responses as “Response A/B/C” to remove identity bias, scored by average rank.
 - Deployed the full-stack app on Vercel at collaborative-ai-eight.vercel.app for public access.
- Avatar Lab – AI Talking Avatar Generator** | *React.js, Coqui TTS, DreamTalk* Feb 2025 – Apr 2025
- Developed a web app that lets users generate a talking avatar video by simply uploading a photo and entering text.
 - Used Coqui TTS to synthesize natural-sounding speech from text input, and DreamTalk to animate lip and facial movements in sync with audio.
 - Built an interactive React.js frontend with real-time video preview and download support.

ACHIEVEMENTS

- Published Mobile Application on Google Play Store**
- Launched FIZI, an AI-powered fitness app, on the Google Play Store and surpassed 100 downloads within the first month of release. FIZI Fitness Genie
- Deployed Full-Stack AI Web Application**
- Built and deployed Collaborative AI, a multi-model LLM deliberation system, as a live public web app at Collaborative AI.
